

Delicate Care™

Skin or Stomach (kangaroo and duck) Feeding Guidelines for Puppies

Summary:

A highly palatable, hypoallergenic elimination diet for dogs of all life stages with sensitive skin or stomach, based on novel proteins and grains. It is boosted with the Omega Magic™ Essential Oil Blend (Omega 3 & 6), vitamins, chelated minerals and prebiotics.

Key Points:

Recommended for dogs of all life stages with Skin or Stomach sensitivities

Hypoallergenic: Novel proteins from Australian Kangaroo and Australian Duck

Novel grain Australian Sorghum (Low Glycaemic Index)

Natural: Naturox (Kemin) incorporated into the whole supply chain so no artificial preservatives are used in the sourcing or manufacturing of ingredients for Delicate Care.

No artificial colouring (leads to some natural colour variation), no artificial flavour

Balanced: Meets or safely exceeds AAFCO nutrient specifications

Protein: Energy ratio (balanced for sustained and steady growth for large breed puppies)

Calcium: Phosphorus ratio (to optimize skeletal development)

Omega Fatty Acids: Delicate Care contains the essential fatty acids that must be supplied in the diet of dogs through Omega Magic™. Omega Magic™ contains balanced Omega-6: Omega-3 fatty acids in ratio close to 5:1 to balance the less inflammatory eicosanoids to help maintain a shiny coat and healthy skin

Omega-6 essential fatty acids are sourced from sunflower oil (not corn oil) to ensure supply of AAFCO specified linoleic acid (C18:2 n-6)

Omega-3 essential fatty acids are sourced from

- Canola oil (local, GMO free) for linolenic acid (C18:3 n-3)
- Fish oil from deep sea sources for very long chain omega-3 fatty acids: eicosapentaenoic acid (EPA; C20:5 n-3) and docosahexaenoic acid (DHA; C22:6 n-3)

Prebiotics: To support the immune system

FOS: promote 'friendly' *Bifidobacteria* in lower gut [Hussein et al. (1999) J.Nutr. 129: 1454S-1456S]

MOS: anti-allergenic effect, attributed to activation of cellular immunity [Ozaki et al. (2007) J Health Sci 53: 766-770]

Chelated Trace Minerals: Addition of chelated minerals (eg. Zinc and Copper) to ensure efficient absorption and delivery of micronutrients for optimum energy and protein metabolism.

Low Smell: Natural *Yucca schidigera* extract assists in reducing body and faecal odours
